

# LEATHER *luce*

LEATHER CONTINUES TO BE A GREAT STAPLE AND WELCOME ADDITION TO ANY WARDROBE. WHETHER IT TAKES THE FORM OF A PAIR OF CLASSIC LEATHER BOOTS OR A MORE EDGY LEATHER DRESS, THERE IS SOMETHING FOR ALL. IT SERVES AS A GREAT ADDITION TO ANY WARM WINTER LOOK.

2014 has seen an influx of leather fashion items in all shapes and sizes.

A 90s influence can be seen when looking at pieces such as pencil skirts, trousers and dresses. However, these pieces have been given a modern edge with added embellishment, trimmings and a varied colour palette.

Jeremy Scott of Moschino has brought the fun back into the traditional look by mixing it with bright bold colours like pink and yellow. However, for a more

wearable look, follow the likes of Fendi and opt for a burgundy piece which not only adds colour but is a key colour trend for the winter months. To carry the trend into summer, invest in items of a more neutral colour such as camel. This will take you seamlessly into next year and can be teamed with crisp whites to get a more glamorous look.

Although there are a number of bold leather pieces to be found on the high street, those who are wanting a more subdued look could opt for some tailored items with simple leather trimming. Alternatively, add a leather boot or invest in a new leather handbag to get the look. A good leather piece won't only make you look bang on trend but can potentially last a lifetime so choose wisely.
